YUL

YOUR ULTIMATE LIFE

Himalayan Spring Water from the Royal Kingdom of Bhutan.

INVESTOR PITCH DECK · PRE-SEED · 2026

Three converging forces create a $1B opportunity.

I

The Plastic Crisis

1 million plastic bottles are sold every minute globally. Consumer backlash and global regulatory pressure to phase out single-use plastic is accelerating at every premium channel.

[1] *Euromonitor / UNEP Global Plastics Report, 2023*

II

The Sustainability Premium

Consumers actively seek sustainable, traceable products and willingly pay more for them. Premium lifestyle buyers lead this shift and they are exactly who we serve.

III

The Source Transparency Gap

India's ₹1B+ premium water market commands luxury pricing. Yet a credibly branded, source-verified Himalayan spring water in sustainable packaging remains an unoccupied position. YUL fills it.

One Product. Three Irreplaceable Advantages.

01

Untouched Origin

GPS-verified Himalayan spring, naturally mineral-rich. No reverse osmosis, no artificial correction. Pure nourishment, exactly as nature intended.

02

GableTop Paper Carton

80% FSC-certified paper packaging. Shelf-stable, scalable, visually premium. Sustainability as a brand statement, not an afterthought.

03

Nourishment Reclaimed

Reclaim your natural baseline with effortless digestion, restored balance, and mineral-supported strength that yields unmistakable mental clarity. It’s nourishment as it was always meant to feel.

An origin story that cannot be replicated.

Royal Kingdom of Bhutan

Environmental protection is constitutionally enshrined since 1971. The source catchment is legally shielded from all industrial activity.

Carbon-Negative Nation

Bhutan absorbs 3× more CO_2 than it produces the world's only carbon-negative country.

Award-Winning Source

Globally acclaimed for mineral balance, purity, and seasonal consistency.

Production Rights

In advanced talks for exclusive rights to the Bhutanese plant for GableTop YUL production.

Volumes with Brand Equity Model.

B2B as the revenue engine · B2C as the scale play

PHASE 01

Year 1–2

Premium HoReCa

- 5-star hotels & luxury resorts
- Fine dining & premium banquets
- Airline lounges & lifestyle venues

Volume + Brand Credibility

→

PHASE 02

Year 1+ (Parallel Track)

B2G Channel

- Government events & hospitality
- VVIP & protocol procurement
- Institutional bulk contracts

High Volume · Institutional Trust

→

PHASE 03

Year 3+

B2C Launch

- Premium modern trade & gifting
- D2C e-commerce & subscriptions
- MRP ₹80–100 / 750ml

Brand Monetisation

***Entry via HoReCa & B2G → Expansion to retail**

Targeting the most defensible 1% of a $1B market.

TAM

$1.02B

Premium bottled water: 8.70% CAGR

SAM

$326M

Premium HoReCa & B2G: 32% of TAM

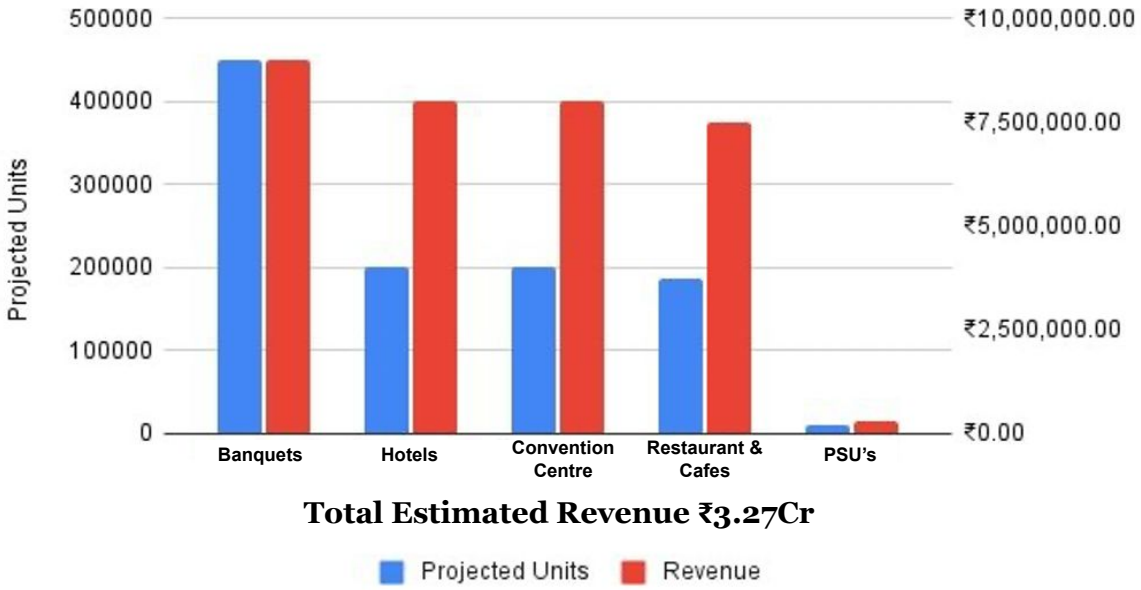
SOM

$3.2M

1% penetration of the target market

Bottom-Up SOM Validation

Projected Units & Revenue vs. Sales Channel · Supporting the $3.2M SOM figure



Premium water growing at 8.70% CAGR. Key drivers: rising affluence, premiumisation of HoReCa channels, and accelerating sustainability mandates across institutional buyers.

38% gross margin · ₹3.5 Cr Year 1 target.

	Per Unit
Selling Price	₹35.00
Cost of Goods Sold	₹21.80
Contribution Margin	₹13.2
Annual Overhead	₹8.85
38% GROSS MARGIN (per unit)	

**Numbers reflect FY2025-26 global supply-chain conditions (elevated raw material & logistics costs). Margins expected to improve materially as volumes scale and conditions normalise.*

✦ 1 LOI SECURED

Mash Foundation

First institutional tie up for the global level sustainability focused Events helping us showcase our product to Industry Leaders and secure B2B deals.

Segment: Premium Corporate · Category: Bulk water supply

PIPELINE STATUS

LOI	1 SECURED, REST IN PROCESS
Excl. Rights	ADV. TALKS
B2G Outreach	ACTIVE

Source Exclusivity

In advanced-stage negotiations with Bhutan plant owners for production.

B2G Pipeline

Govt & VVIP hospitality outreach underway via Sanjay Verma (27+ yrs procurement). Early-stage conversations active.

Why We Win

ORIGIN

Source Monopoly

Bhutanese spring water is a finite, legally protected resource. Our source cannot be acquired, replicated, or invented by any competitor at any price due to stringent norms & policy.

ECONOMICS

Disruptive Unit Economics

₹35 ex-factory delivers 38% gross margin while undercutting the ₹75–200 premium tier. A structural advantage not a pricing concession.

TIMING

First-Mover Window

~24 months to define and own Bhutanese lifestyle water in India before legacy brands pivot to paper packaging. The clock is ticking in our favour.

CHANNEL

Dual-Engine Growth

HoReCa + B2G builds volume AND brand equity together. Every 5-star placement is a premium marketing touchpoint at zero additional cost.

₹9.4 Cr

US $1.00 Million

12 months to prove the model in India's premium HoReCa & B2G segment.

49.23%

Capital Expenditure

Production infrastructure in Bhutan.

50.77%

Operating Expenditure

12-month runway: team, marketing, logistics.

USE OF FUNDS

Factory setup (Bhutan)	~₹4.6 Cr
Marketing & Brand	~₹1.8 Cr
Logistics & Supply	~₹1.5 Cr
Team (12 months)	~₹1.5 Cr

Year 1 Target ₹3.5 Cr / 1M Units
